BENYI (ZHEJIANG) SAFETY PROTECTION CO., LTD.

Company Profile

Benyi (Zhejiang) Safety Protection Co., Ltd. is a high-tech enterprise with IoT technology as its core, focusing on IoT services in the field of intelligent security. It integrates product research and development, manufacturing, design, sales, and service.

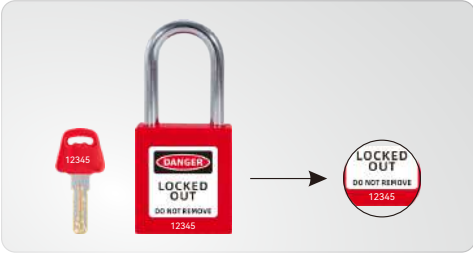

Benyi (Zhejiang) Security mainly engages in technology development, security equipment manufacturing, hardware product manufacturing and research and development, sales of smart home consumer devices, IoT technology services and application services, and sales of information security equipment. Benyi (Zhejiang) Safety Protection Co., Ltd. looks forward to your joining!

Lockout Station 54-59

Safety Lockout Kit 60-62

Security Lock Station Combination Set 63-68

Security Lock Bag Combination Set 69-71

Safety Lock Box Combination Set 72-74

What is lockout-tagout (Lockout/Tagout=LOTO)

- When equipment or tools are being repaired, maintained, or cleaned, the power sources related to the equipment are cut off, ensuring that the equipment or tools cannot be started, and all energy sources (electric power, hydraulic sources, air sources, etc.) are turned off.

Lockout	Locking a device that has been powered off or disconnected from energy sources to prevent others from turning on the power or energy (such as opening a valve) is a safety measure.
Warning Sign	Hang the corresponding warning or caution sign (such as "Do not close, someone is working") on a power or energy disconnection device that has been powered off or disconnected, to warn others not to turn on the power or energy - a safety measure.
Disengage the device	A device or group of devices capable of disconnecting from the connected power supply circuit.
LOTO	It is to ensure that the power to the equipment is absolutely cut off, keeping the equipment in a safe state. This can prevent accidental injuries to workers or other personnel working inside or next to the equipment due to the equipment being inadvertently turned on.

Why should locks and signs be used :

- Lockout-tagout is implemented to prevent workers from encountering accidental startups, abnormal startups, or the release of power sources during maintenance or servicing equipment, ensuring the personal safety of the workers.

Which places need to be locked :

- Daily maintenance, repair, adjustment, cleaning, inspection, and commissioning on equipment. Operations involving live work, entering confined spaces, hot work, disassembly, etc., at facilities such as towers, tanks, kettles (and various types of containers), heat exchangers, pumps, etc.
- High-voltage operations (including those performed near high-voltage lines).
- Operations that require the temporary shutdown of safety systems.
- Operations during non-process maintenance and commissioning.

Ben Yi security locks fully comply with regulations, and the requirements for safety locks and locking devices are as follows:

Requirement	Environmental adaptation	Solid	Standardization	Recognizable	Safety purposes
Describe	Made with materials that can tolerate various environments	Unless deliberately applied with great force, it cannot be removed.	Make distinct distinctions through differences in color, shape, or size.	Personnel authorized to use the device	Unusable energy for purposes other than control
Is it up to standard	✓	✓	✓	✓	✓

The use function and method of the key's biting

KD-Different Flower Keys

One key can only open one padlock;
Advantage: Your lock cannot be opened by keys of other locks.

KA-Flower Key

A single key can open all the padlocks in the same set;
Advantages: Customizable for multiple sets, sets cannot open each other.

MK-Universal key

KDMK Universal key for different flowers

KAMK Universal Flower Key

A single key can open all padlocks in several groups;
Advantages: Groups can be opened with a master key.

GMK - Higher Level Management Key

A single key can open all padlocks of groups KD, KA, or MK.

The color function, usage, and method of keys

- Our company provides customers with 11 different colored key covers to enhance the functionality of keys when used. (See the image below.)

- For example, the master key is fitted with a black key cover, while the sub-keys are not, making it easy to distinguish which one is the master key in real situations. (As shown in the image below.)

- Departments are assigned different colors, for example, red keys with red padlocks are allocated to the Electrical Maintenance Department, yellow keys with yellow padlocks are allocated to the Fitter Department, and blue keys with blue padlocks are allocated to the Production Department. This way, by seeing the color, it is clear which department is conducting maintenance or which department's keys they are, making management more convenient.

Key archive management

Our company can encode and archive each key and padlock, so that in the event of a key or padlock being lost, just by seeing a part of the code, we can match the padlock or key. This prevents chaos in the entire key management system.

Key Management System Order System Example

BY-G38-KD, 100
BY-G38-KA, 200

For example: BY-G38-KDMK, 2 sets, 300 keys per set, customizable number of master keys;

For example: BY-G38-KAMK, 3 sets, 400 keys per set, customizable number of master keys,

please specify if the keys are inter-changeable between sets or within sets.

Except for jacket locks and dry layer lock series, any other series can choose any management key system. If a more complex grouping method for the management key system is required, please refer to this page or call for consultation.

How to select the number of key sets

Number of zinc lock cores						
Key system	Letter description	Management level	Number of groups (groups)	Number of items in the group (pieces)	Serial number	Note
Ordinary key	KD	None	None	1-99999	—	—
Universal Management Key	MK	Secondary management	6	860	—	Backup
			5	710	—	Backup
			30	580	—	Regular inventory
Higher level management key	GMK	Three-level management	6	80	GMK3A series	—
			15	24	GMK3B series	—

Note: If the management key system requires a more complex grouping method, please call for consultation.

Number of copper lock cores						
Key system	Letter description	Management level	Number of groups (groups)	Number of items in the group (pieces)	Serial number	Note
Ordinary key	KD	None	None	1-99999	—	—
Universal Management Key	MK	Secondary management	1	36000	00series	Backup
			6	5000	10series	Backup
			30	1000	20series	Regular inventory
Higher level management key	GMK	Three-level management	4	6000	GMK3 series	—
			23	1000	GMK4 series	—

Note: If the management key system requires a more complex grouping method, please call for consultation.

Aluminum safety padlock

Product features

- The lock body is made of machined aluminum alloy, with an anodized surface that is bright and colorful, and the metal lock bar is corrosion-resistant;
- Customizable customer logos with stamped LOGO;
- UV-resistant and corrosion-proof;
- Self-resetting padlock: the lock bar automatically pops out when unlocked, and the lock core automatically locks when closed;
- Key retention feature: ensures that the padlock will not be left on-site in the open state;
- Laser engraving on both sides and the front of the lock body to retain permanent identification or codes;
- The lock body is available in a variety of colors.

BY-G Safety Padlock Series

Your Well-being in Our Care

BEEYI

BY-G Safety Padlock Series

Your Well-being in Our Care

BY-G00 Engineering safety padlocks

Product features

- The lock body is made of engineering plastic reinforced nylon PA, featuring an integrated housing design for enhanced durability, resistance to temperature differences (-30 ~+120), and impact resistance. The metal lock bar is treated with chrome plating;
 - Self-developed lock core with a push-pull dustproof device, protecting the lock core from dust. Suitable for environments with heavy dust exposure;
 - Includes "Danger" and "Owner" writable labels (made of glow-in-the-dark PVC material), with options for custom Chinese or other multilingual labels;
 - UV resistant and corrosion-proof, free of silicone;
 - Self-resetting padlock: The lock bar automatically pops out when unlocked, and the lock core automatically locks when closed;
 - Key retention: Ensures that the padlock will not be left on-site in the open position;
 - Laser engraving on both sides and the front of the lock body for permanent identification or coding;
- A variety of colors are available for the lock body.

Your Well-being in Our Care

BY-G29T/N29T Miniature safety padlock

Product features

- The lock shell is made of modified nylon PA, featuring an integrated housing design for enhanced durability, resistance to temperature differences, impact, and UV rays. The steel lock shackle is chrome-plated for corrosion resistance;
- the key retention feature ensures that the padlock will not be left in the open position on-site;
- The lock body is available in various colors, with labels defaulting to English & Chinese, and can be customized with multiple languages;
- any part of the lock body can be etched with a permanent code or identifier;
- A variety of colors are available for the lock body.

BY-GF25/38/76 Dustproof safety padlock

Product features

- The lock shell is made of modified nylon PA and features an integrated housing design for enhanced durability, resistance to temperature differences, impact, and UV rays. The steel lock shackle is chrome-plated for corrosion resistance;
- it is also UV resistant and corrosion resistant.
- Self-resetting padlock: The lock shackle automatically pops out when unlocked, and the lock core automatically locks when closed.
- Key retention: Ensures that the padlock will not be left in the open position at the site.
- Laser engraving on both sides and the front of the lock body is available for permanent identification or coding.
- Dust-proof device to protect the lock hole from dust. Suitable for environments with a lot of dust.
- A variety of colors are available for the lock body.

02 Safety hasp series

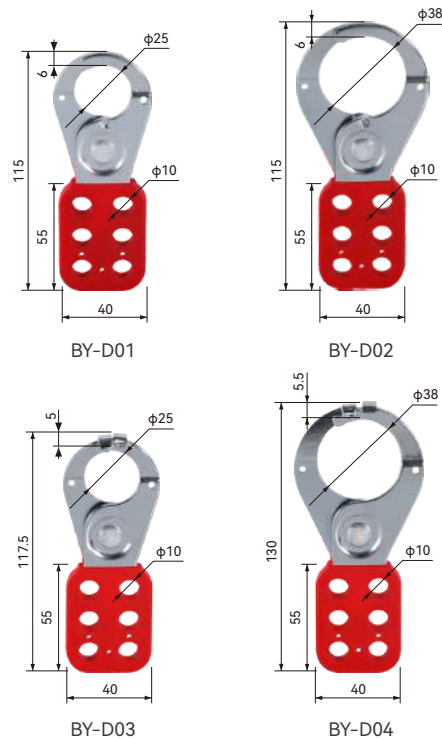

BY-D Safety hasp

Your Well-being in Our Care

BY-D01~04 Steel hasp

Unit: mm

Product features

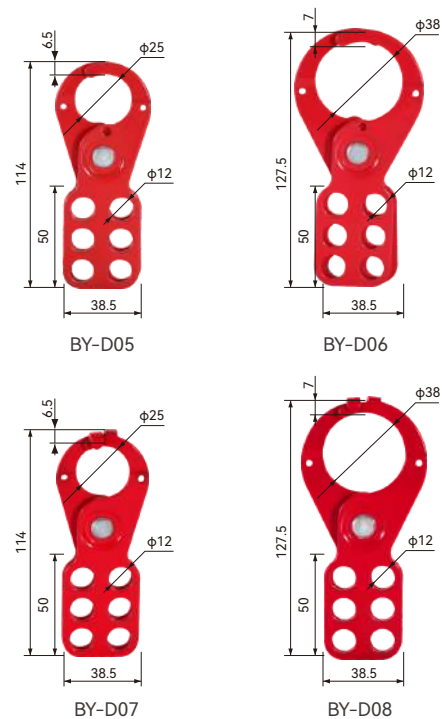

- The handle is made of nylon PA by injection molding, and the surface of the lock hook is treated with zinc plating, which can prevent rust and scratch;
- Lock hole diameter: 9.8mm;
- Hook diameter: 1"(25mm), 1.5"(38mm);
- The color of the handle can be customized;
- Six-hole design, allowing six people to lock at the same time, achieving the purpose of multi-person management of the same energy source.

Product selection

Product model	Product specifications
BY-D01	A hook with a diameter of 1" (25mm) can accommodate 6 padlocks.
BY-D02	A hook with a diameter of 1.5" (38mm) can accommodate 6 padlocks.
BY-D03	A hook with a diameter of 1" (25mm) can accommodate 6 padlocks.
BY-D04	A hook with a diameter of 1.5" (38mm) can accommodate 6 padlocks.

BY-D05~08 Economic steel hasp

Unit: mm

Product features

- Made of iron, with a durable and eye-catching anti-rust coating on the surface;
- Lock hole diameter: 12mm;
- Hook diameter: 1"(25mm), 1.5"(38mm);
- Six-hole design, allowing 6 people to lock at the same time, achieving the purpose of multiple people managing the same energy source.

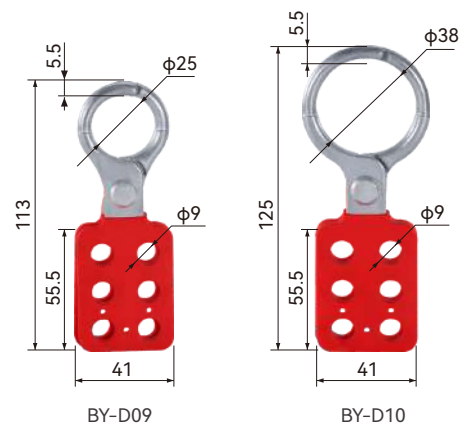

Product selection

Product model	Product specifications
BY-D05	A hook with a diameter of 1" (25mm) can accommodate 6 padlocks.
BY-D06	A hook with a diameter of 1.5" (38mm) can accommodate 6 padlocks.
BY-D07	A hook with a diameter of 1" (25mm) can accommodate 6 padlocks.
BY-D08	A hook with a diameter of 1.5" (38mm) can accommodate 6 padlocks.

BY-D Safety hasp

BY-D09/10 Aluminum Lockout hasp

Unit: mm

Product Features

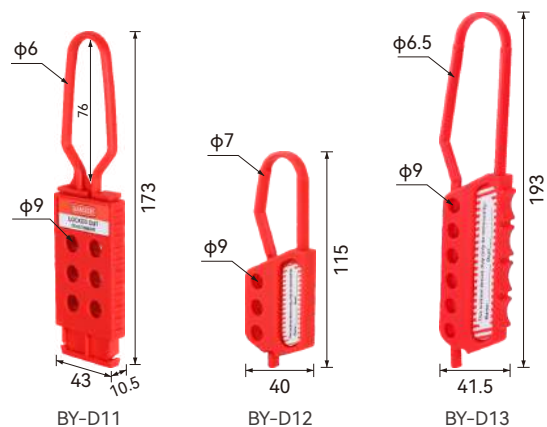

- The handle is made of PA nylon by moldin g, and the lock hook is made of chrome-pl ated aluminum;
- lock hole diameter: 9mm;
- hook diameter: 1"(25mm), 1.5"(38mm);
- Handle color can be customized;
- Six-hole design, allowing 6 people to lock simultaneously, achieving the purpose of multiple people managing the same energy source.

Product selection

Product model	Product specifications
BY-D09	A hook with a diameter of 1" (25mm) can accommodate 6 padlocks.
BY-D10	A hook with a diameter of 1.5" (38mm) can accommodate 6 padlocks.

BY-D11~13 Nylon Lockout hasp

Unit: mm

Product Features

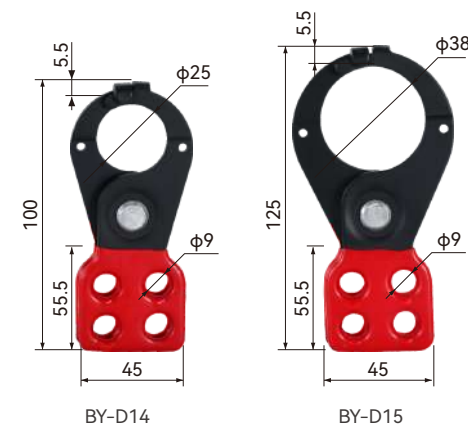

- Made of durable nylon PA, it does not easily break; Suitable for electrical isolation locking, high corrosion resi stance or explosion-proof requirements;
- Three or six hole design, allowing 3/6 people to lock at the same time, open by pushing and pulling up and down , open from the side.。

Product selection

Model	Product specifications
BY-D11	Size: 43mm×173mm can accommodate up to 6 padlocks
BY-D12	Size: 40mm×115mm can accommodate up to 3 padlocks
BY-D13	Size: 43mm×193mm can accommodate up to 6 padlocks

BY-D14/15 Steel Lockout hasp

Unit: mm

Product Features

- The handle is made of nylon PA by injection molding, and t he lock hook surface is galvanized to prevent rust and scrat ches;
- Lock hole diameter: 9mm;
- Hook diameter: 1"(25mm), 1.5"(38mm);
- The color of the handle can be customized;
- Four-hole design, allowing four people to lock at the same t ime, achieving the purpose of multi-person management of the same energy source.

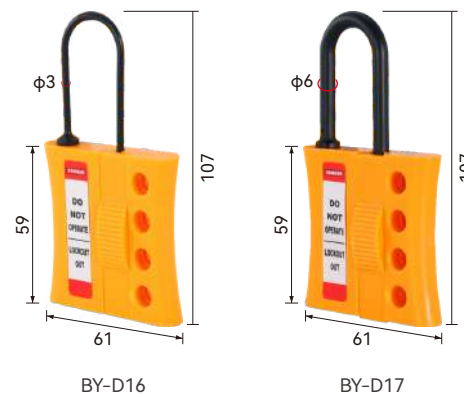

Product selection

Product model	Product specifications
BY-D14	A hook with a diameter of 1" (25mm) can accommodate 4 padlocks.
BY-D15	A hook with a diameter of 1.5" (38mm) can accommodate 4 padlocks.

BY-D Safety hasp

BY-D15/16 Nylon Lockout hasp

Unit: mm

Product Features

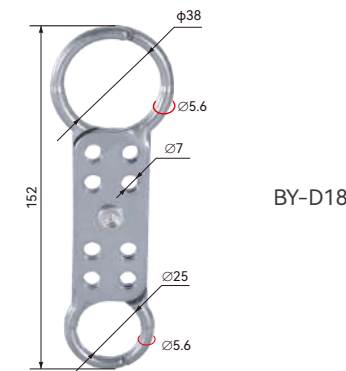

- The lock body is made of engineering plastic ABS, the lock shackle is made of PA nylon;
- When locking a single source, multiple padlocks can be used for locking;
- Sliding locking design, providing lock shackle diameters of 3mm and 6mm;
- Suitable for electrical isolation locking, places with high require ments for corrosion resistance or explosion protection;
- Four-hole design, allowing four people to lock simultaneously, a chieving the purpose of multi-person management of the same energy source.

Product selection

Product model	Product specifications
BY-D16	The hook with a shaft diameter of 3mm can accommodate up to 4 padlocks.
BY-D17	The hook with a shaft diameter of 6mm can accommodate up to 4 padlocks.

BY-D18 Double-end Aluminum Lockout Hasp

Unit: mm

Product Features

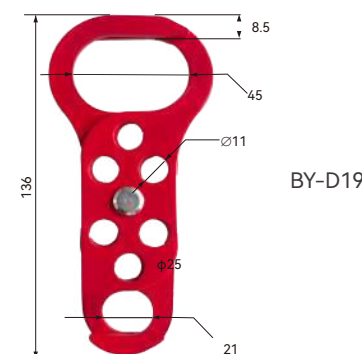

- Made of high-resistance fireproof aluminum alloy;
- Accepts padlocks with a maximum shackle diameter of 7mm;
- The two ends are locking shackles of different specifications, which are suitable for different occasions;
- An eight-hole design allows for 8 people to lock simultaneously, achieving the goal of multiple people managing the same ener gy source.

Product selection

Product model	Product specifications
BY-D18	Up to 8 padlocks can be accommodated.

BY-D19 Double-end Steel Lockout Hasp

Unit: mm

Product Features

- Made of iron with a durable and eye-catching anti-rust coating;
- Accepts padlocks with a maximum shackle diameter of 11mm;
- The double-end type is equipped With two sizes, suitable for different Occasions;
- Six-hole design allows for six people to lock simultaneously, achieving the goal of multiple people managing the same ener gy source.

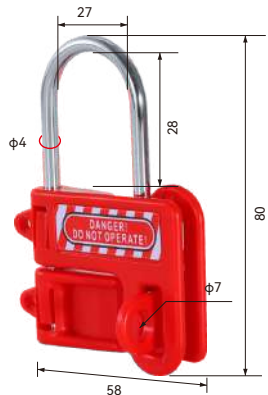

Product selection

Product model	Product specifications
BY-D19	Can accommodate up to 6 padlocks.

BY-D Safety hasp

BY-D20 Butterfly anti-pry hasp

Unit: mm

BY-D20

Product Features

- The lock beam is made of steel with a surface chrome-plate d finish, and the handle is made of ABS engineering plastic; the lock hole diameter is 8mm;
- The 4-millimeter steel latch is suitable for smaller locking points;
- It can be locked by two people at the same time.

Product selection

Product model	Product specifications
BY-D20	Dimensions: 58mm×80mm, can accommodate up to 2 padlocks.

BY-D21 Steel Lockout Hasp

Unit: mm

BY-D21

Product Features

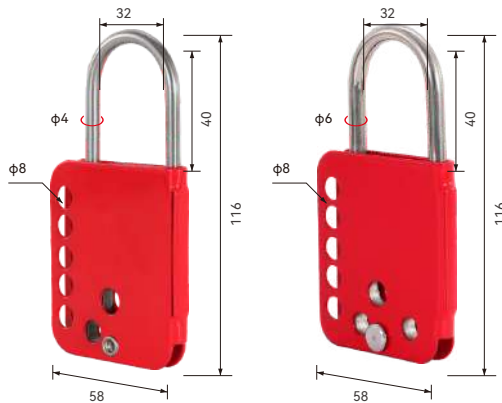

- Made of steel and aluminum materials, with high-temperature spray plastic anti-rust treatment on the surface;
- not easy to be pried, sturdy and durable;
- the beam shaft diameter is 5mm, can accommodate up to 6 padlocks.

Product selection

Product model	Product specifications
BY-D21	Can accommodate up to 6 padlocks.

BY-D23/24 Butterfly anti-pry hasp

Unit: mm

BY-D23

BY-D24

Product Features

- Made of hard steel plate, the lock body surface has undergone high-temperature plastic spraying treatment;
- multiple locking methods;
- Easy to achieve multi-person joint management;
- Suitable for industries such as chemical, machinery manufacturing, and power energy.

Product selection

Product model	Product specifications
BY-D23	The shaft diameter is 4mm, it can accommodate up to 7 padlocks at most.
BY-D24	The shaft diameter is 6mm, it can accommodate up to 8 padlocks at most.

BY-D Safety hasp

BY-D25 Aluminum Lockout Hasp

Unit: mm

BY-D25

Product Features

- Made of super-strong aluminum alloy, the material is durable and resistant.
- Integrating traditional fasteners with hang tags;
- The combination of labels and buckles enhances the applicability of the product , the temperature-resistant design of the hang tags makes them suitable for a variety of environments;
- The front and back sides of the tag can be written with pens, the tag color can be customized.

Product selection

Product model	Product specifications
BY-D24	Can accommodate up to 6 padlocks.

BY-D26 Aluminum Lockout Hasp

Unit: mm

BY-D26

Product Features

- Made of super-strong aluminum alloy, the material is durable and resistant.
- Integrating traditional fasteners with hang tags;
- The combination of labels and buckles enhances the applicability of the product , the temperature-resistant design of the hang tags makes them suitable for a variety of environments;
- The front and back sides of the tag can be written with pens, the tag color can be customized.

Product selection

Product model	Product specifications
BY-D26	Can accommodate up to 8padlocks

BY-D27 Aluminum Lockout Hasp

Unit: mm

BY-D27

Product Features

- Made of super-strong aluminum alloy, the material is durable and resistant.
- Integrating traditional fasteners with hang tags;
- The combination of labels and buckles enhances the applicability of the product , the temperature-resistant design of the hang tags makes them suitable for a variety of environments;
- The front and back sides of the tag can be written with pens, the tag color can be customized.

BY-D Safety hasp

Your Well-being in Our Care

BY-D28 Steel hasp

Unit: mm

BY-D28

Product Features

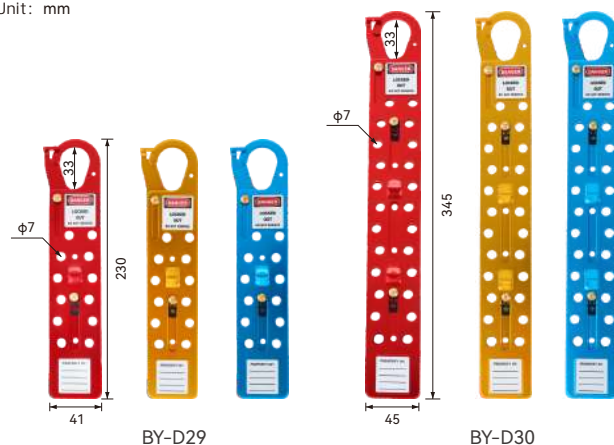

- The lock body is made of steel plate;
- It comes with a distinctive label (customizable), polygonal design, suitable for the size of pad locks;
- red label (customizable color);
- It features a 7-hole design, allowing 7 people to lock it simultaneously.

Product selection

Product model	Product specifications
BY-D28	Can accommodate up to 7 padlocks.

BY-D30/31 Aluminum hasp

Unit: mm

BY-D29

BY-D30

Product Features

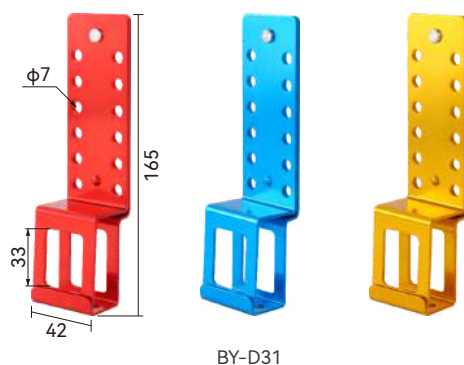

- Made of super-strong aluminum oxide, with surface anodized treatment;
- lock hole diameter is 7mm or 8mm;
- Suitable for multiple people locking management.

Product selection

Product model	Product specifications
BY-D29	Can accommodate up to 12 padlocks.
BY-D30	Can accommodate up to 24 padlocks.

BY-D32 Aluminum hasp

Unit: mm

BY-D31

Product Features

- Made of super-strong aluminum oxide, with surface anodized treatment;
- lock hole diameter is 7mm or 8mm;
- Suitable for multiple people locking management.

Product selection

Product model	Product specifications
BY-D31	Can accommodate up to 12 padlocks.

03 Industrial Electric Lockout Series

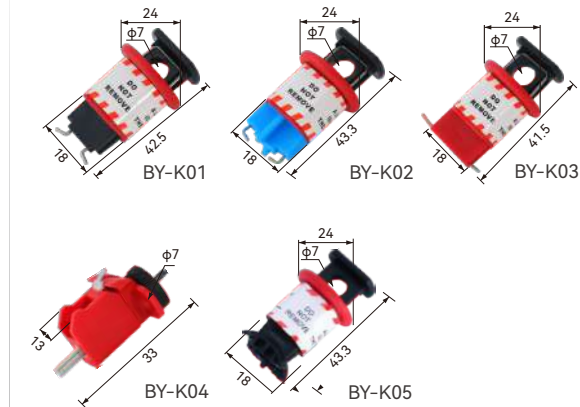

BY-K Series Electrical Lockout

Your Well-being in Our Care

BY-K01~05 Miniature Circuit Breaker Lockout

Unit: mm

Product Features

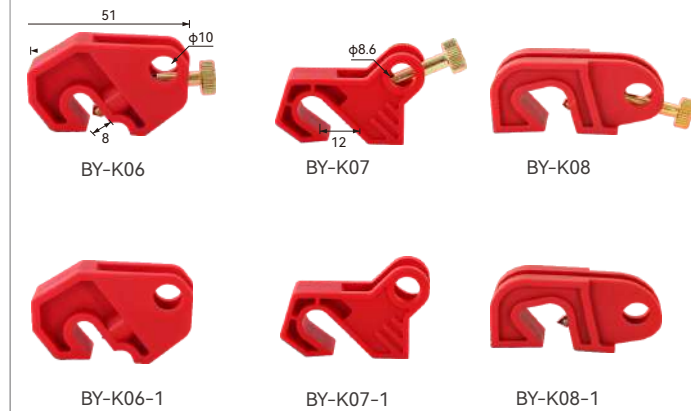

- Made of engineering plastic reinforced nylon PA;
- Compatible with European and Asian equipment, used for locking small circuit breakers;
- Recommended to use with the padlocks together for industrial safety;
- Easy to install, no tools required;
- Maximum lock diameter of 7.3mm can be accommodated;
- It is available for Single pole and multi-pole circuit breaker locks.

Product selection

Product model	Product specifications
BY-K01	Pins outward, suitable for miniature circuit breakers with a pin spacing 10mm.
BY-K02	Pins inward, suitable for miniature circuit breakers with a pin spacing 10mm.
BY-K03	Pins outward, suitable for miniature circuit breakers with a pin spacing 20mm.
BY-K04	Lever-type, universal, suitable for most small and miniature circuit breakers.
BY-K05	Pins outwards, suitable for Schneider miniature circuit breakers.

BY-K06~08 Simple Circuit Breaker Lockout

Unit: mm

Product Features

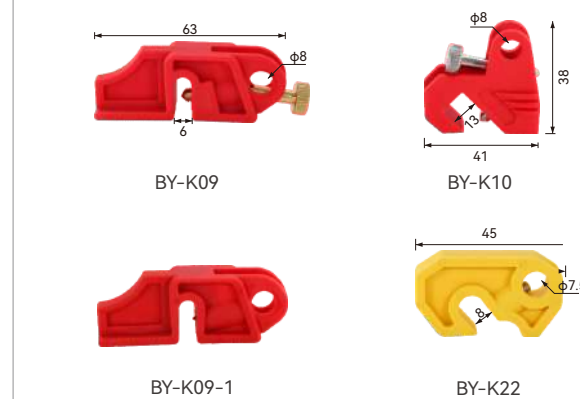

- Made of durable reinforced nylon;
- Using a screwdriver to lock it ;
- Can be locked with a safety padlock with a shackle diameter 7mm;
- It is available for various types of circuit breakers.

Product selection

Product model	Product specifications
BY-K06	Suitable for single-pole miniature circuit breakers with a handle thickness 7.7mm
BY-K06-1	Suitable for 2-4 pole miniature circuit breakers
BY-K07/07-1	Suitable for medium circuit breaker with handle thickness 9mm
BY-K08/08-1	Suitable for Miniature circuit breaker with handle thickness 8.5mm

BY-K09/10 Miniature Circuit Breaker Lockout

Unit: mm

Product Features

- Made of sturdy reinforced nylon and copper screws;
- Equipped with locking screws, It can be locked easily without tools.
- Miniature circuit breakers for handle thickness <9mm.

Product selection

Product model	Product specifications
BY-K09	Suitable for handle thickness 5mm medium and small size plastic case circuit breakers
BY-K09-1	Suitable for handle thickness 5mm medium and small size plastic case circuit breakers
BY-K10	Suitable for various types of small and medium-sized circuit breakers
BY-K22	Applicable for large circuit breakers

BY-K Series Electrical Lockout

Your Well-being in Our Care

BY-K11~13 Clamp-On Circuit Breaker Lockout

Unit: mm

Product Features

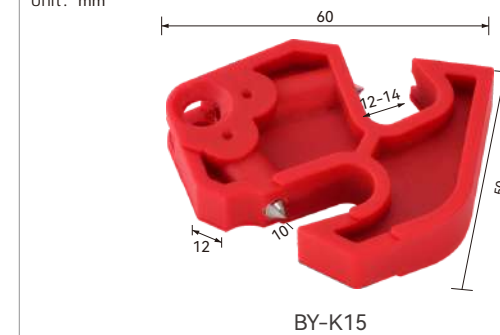

- The base is made of PA66+20%GF, the lock body is made of PA+ABS;
- Suitable for various medium-sized built-in trip molded case circuit breakers;
- Tighten with special fastening screw to the switch handle, then fasten the cover to the special screws to prevent loosening
- The new blade design, with less effort but more tighter connection ;
- The removable clamping plate (included) , can be used for Circuit Breaker of different sizes.
- Can be locked with a safety padlock with a shackle diameter 7mm;
- The base can clamp the bottom of the lock body easily;
- The slidable long clamp plate ensures the locking of the circuit breaker.

Product selection

Product model	Product specifications
BY-K11	Lockable handle width 16mm circuit breaker
BY-K12	Lockable handle width 41mm circuit breaker
BY-K13	Lockable handle width 70mm circuit breaker

BY-K15 Double-acting circuit breaker lockout

Unit: mm

Product Features

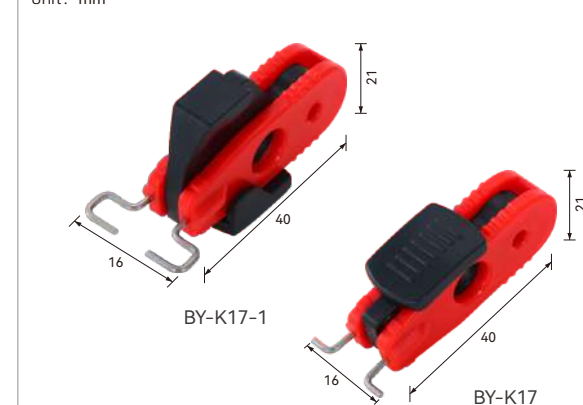

- Made of engineering plastic reinforced nylon PA;
- Two different sizes at both ends can lock various types of circuit breakers;
- locked by screwdriver;
- Lock hole diameter is 6.5mm.

Product selection

Product model	Product specifications
BY-K15	Lockable handle width 10mm circuit breaker
	Lockable handle width 14mm circuit breaker

BY-K17 Miniature Circuit Breaker Lockout

Unit: mm

Product Features

- Made of ABS engineering plastic;
- Lock hole diameter is 7.5mm ;
- Locks out most small circuit breakers.

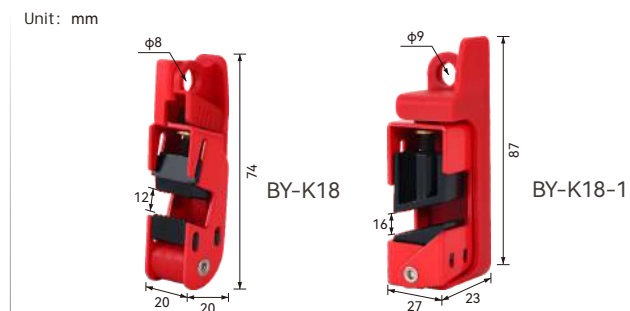

Product selection

Product model	Product specifications
BY-K17-1	Locking pin pitch 13mm miniature circuit breaker.
BY-K17	Suitable for most hand-held cutouts of 11mm or smaller miniature circuit breakers

BY-K Series Electrical Lockout

Your Well-being in Our Care

BY-K18 Circuit Breaker Lockout

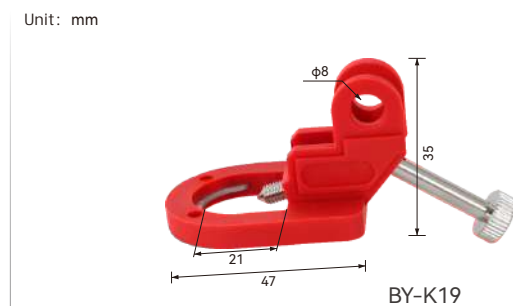

Product Features

- The lock body is made of die-cast aluminum alloy, nylon, and steel. The surface is treated with metal spray painting.
- It comes with locking screws, easy and tool-free locking.

Product selection

Product model	Product specifications
BY-K18	Lockable handle width 12mm circuit breaker
BY-K18-1	Lockable handle width 16mm circuit breaker

BY-K19 Multifunctional Circuit Breaker Lockout

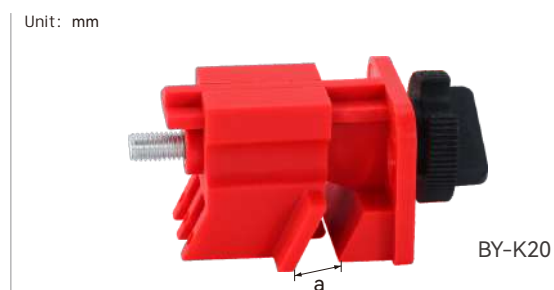

Product Features

- Made of ABS engineering plastic.
- Lock hole diameter is 7.5mm.
- Locks out most small circuit breakers.

Product selection

Product model	Product specifications
BY-K19	Suitable for medium-sized circuit breakers (handle width 20mm)

BY-K20 Circuit Breaker Lockout

Product Features

- Made of engineering plastic reinforced nylon PA.
- Equipped with locking screws, can be easily locked without tools.
- Suitable for various small circuit breakers (handle width 7mm, clamping size 15mm).

Product selection

Product model	Product specifications
BY-K20	Lock most single and multipole old-style circuit breakers.

BY-K21 Circuit Breaker Lockout

Product Features

- The lock body is made of reinforced nylon PA, resistant to temperatures from -20°C to 120°C.
- It comes with locking screws for easy installation.
- The lock hole diameter is 9mm.

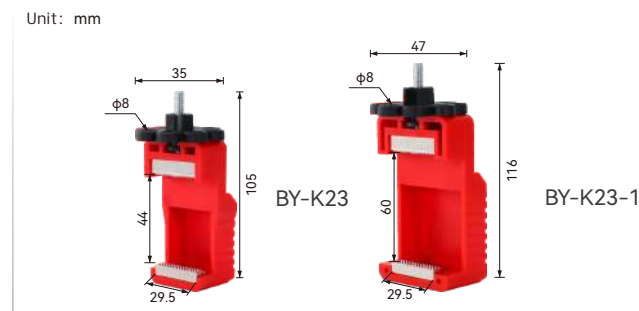

Product selection

Product model	Product specifications
BY-K21	The maximum clamping size is 10mm.

BY-K Series Electrical Lockout

Your Well-being in Our Care

BY-K23 Motor protection switch lockout

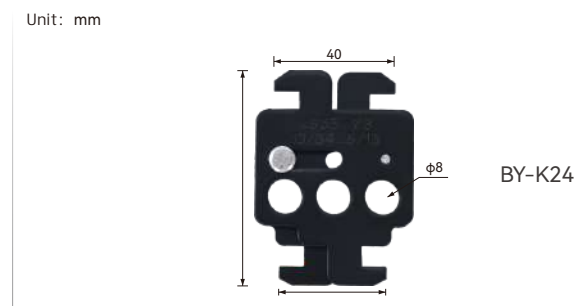

Product Features

- Made of ABS engineering plastic.
- Tool-free installation, equipped with ergonomic structure sturdy screws.
- The 4-hole positions can be adjusted to lock.

Product selection

Product model	Product specifications
BY-K23	Applicable to button type motor protection switch, Maximum clamping size is 44mm.
BY-K23-1	Applicable to button type motor protection switch, Maximum clamping size is 60mm.

BY-K24 Circuit Breaker Lockout

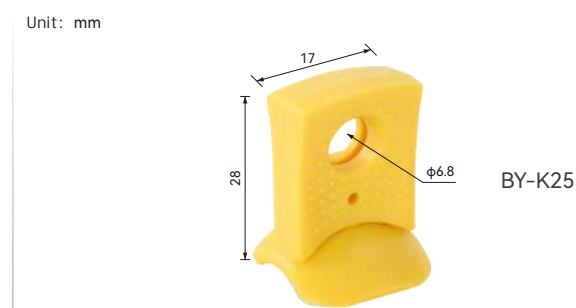

Product Features

- Made of cold-rolled steel plate, with surface electrophoresis treatment.
- Sliding left and right, two positions of adjustable.
- Suitable for multi-person locking management use.
- Lock hole diameter is 8mm.

Product selection

Product model	Product specifications
BY-K24	EZD400-630A series of molded case circuit breakers Suitable for Schneider Electric NSX-N and

BY-K25 Circuit Breaker Lockout

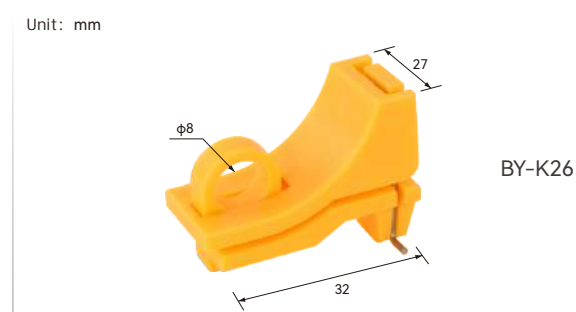

Product Features

- Made of ABS engineering plastic.
- Can be locked easily without tools.
- Lock hole diameter is 6.8mm.
- To lock Schneider-specific circuit breakers to prevent accident.

Product selection

Product model	Product specifications
BY-K25	Applicable to Schneider IC65 or IC65N series singlepole or multi-pole miniature circuit breaker

BY-K26 Miniature Circuit Breaker Lockout

Product Features

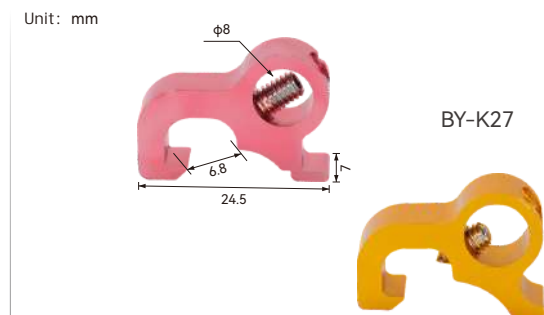

- Made of PA nylon.
- Can be locked easily without tools.
- Lock hole diameter is 8mm.

Product selection

Product model	Product specifications
BY-K26	Suitable for small circuit breakers

BY-K Series Electrical Lockout

BY-K27 Multi-pole circuit breaker lockout

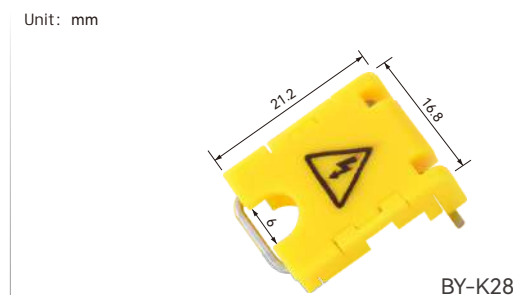

Product Features

- Made of aluminum alloy, with surface oxidation treatment, more resistant to corrosion;
- Should be used in conjunction with a small flat-head screwdriver;
- Lock hole diameter 8.3mm;
- Applicable to multi-pole miniature circuit breakers.

Product selection

Product model	Product specifications
BY-K27	The maximum clamping size is 10mm.

BY-K28 Miniature Circuit Breaker Lockout

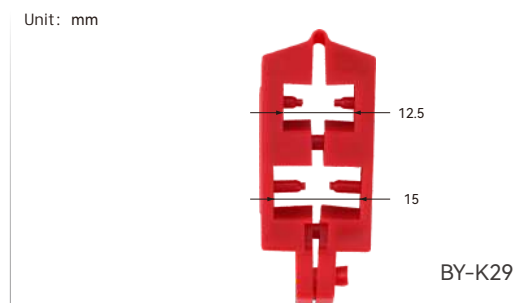

Product Features

- The lock body is made of reinforced nylon material ;
- Lock the circuit breaker in the closed position to prevent accidental opening ;

Product selection

Product model	Product specifications
BY-K28	Locks with a shackle diameter of 5mm can be used in conjunction with padlocks.

BY-K29 Clamp-On Circuit Breaker Lockout

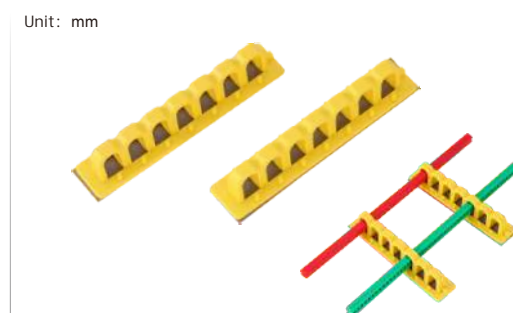

Product Features

- Made of modified engineering plastic nylon PA;
- Simple and convenient to use, just snap into the correct position and lock;
- Dual-control design, suitable for switches of different sizes;
- Can be locked with two safety padlocks with a shackle diameter 7mm ;

Product selection

Product model	Product specifications
BY-K29	Applicable to a very small number of circuit breakers with holes on both sides.

BY-K30 Circuit breaker group lockout

Product Features

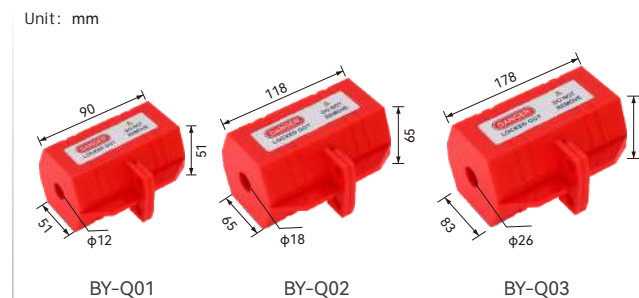

- Made of ABS engineering plastic ;
- The adhesive back of the track can be fixed on the distributor permanently; (Just clean the panel and stick it on, no need to drill holes);
- Can be locked with two safety padlocks with a shackle diameter 7mm ;
- The red stop bar indicates that the switch is in the off position. The green barrier indicates that the switch is in the on position.

Product selection

Product model	Product specifications
BY-30	The length of the rod is 195mm, suitable for most plastic case circuit breakers.

BY-Q Series Electrical Lockout

BY-Q01~03 Power plug lockout

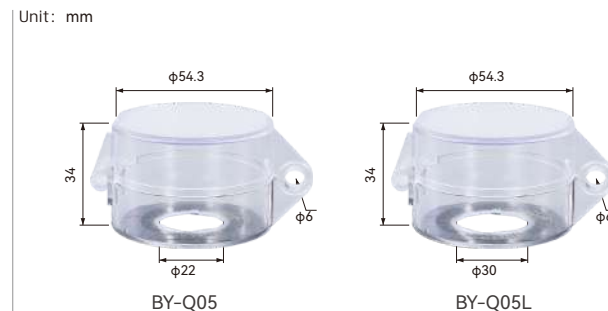

Product Features

- It is made of ABS engineering plastics and can withstand temperature from -20 to +90 .
- The double-open hexagonal lock design , available for various industrial plugs;
- It can realize 2-4 safety padlocks with the diameter of lock beam 7mm.

Product selection

Product model	Product specifications
BY-Q01	locks the plug with wire diameter 12.5mm and plug diameter 45mm
BY-Q02	locks the plug with wire diameter 13mm and plug diameter 59mm
BY-Q03	locks the plug with wire diameter 18mm and plug diameter 58mm

BY-Q05/05L Emergency Stop Button Guard

Product Features

- The lock body is made of glass fiber reinforced polycarbonate, resistant to temperature differences and not prone to aging;
- visual management, the bottom can be fixed with 3M adhesive.

Product selection

Product model	Product specifications
BY-Q05/05L	Suitable for buttons with a neck diameter 22mm(30mm) and height 34mm.

BY-Q06/06L Emergency Stop Button Guard

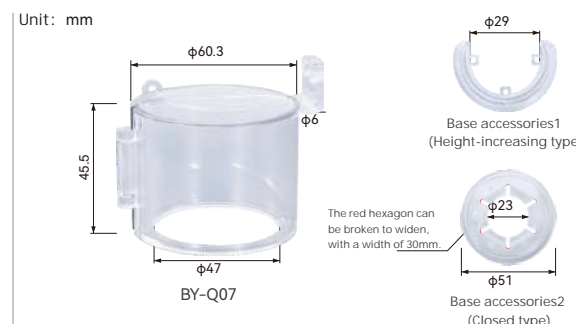

Product Features

- The lock body is made of glass fiber reinforced polycarbonate, resistant to temperature differences and not prone to aging;
- visual management, the bottom can be fixed with 3M adhesive.

Product selection

Product model	Product specifications
BY-Q06/06L	Suitable for buttons with a neck diameter 22mm and height 27mm.

BY-Q07 Emergency Stop Button Guard

Product Features

- The lock body is made of glass fiber reinforced polycarbonate, resistant to temperature differences and not prone to aging;
- visual management, the bottom can be fixed with 3M adhesive.

Product selection

Product model	Product specifications
BY-Q07	Suitable for buttons with neck diameter 23mm (29mm or 47mm), and height 45mm.

BY-Q Series Electrical Lockout

Your Well-being in Our Care

BY-Q08 Industrial plug lockout

Unit: mm

BY-Q08

Product Features

- Made of engineering plastic ABS;
- Suitable for locking various sizes of industrial waterproof plugs.

Product selection

Product model	Product specifications
BY-Q08	Suitable for 6-125A industrial waterproof plug

BY-Q09 Power handle lockout

Unit: mm

BY-Q10

Product Features

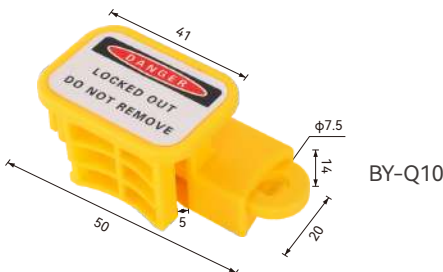

- Made of ABS material ;
- Suitable for handle-type switches ;
- It can be fixed to the electrical panel using the built-in strong adhesive at the bottom, while also leaving mounting hole positions for optional screw installation.

Product selection

Product model	Product specifications
BY-Q10	8mm Handle width 16mm

BY-Q10 Industrial plug lockout

Unit: mm

BY-Q10

Product Features

- The lock body is made of engineering plastic ABS, resistant to temperatures ranging from -20°C to 120°C ;
- Compact and lightweight, capable of locking various sizes of industrial waterproof plugs.

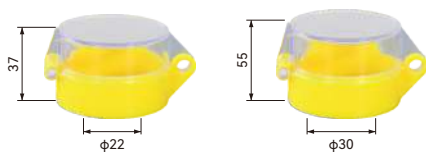

Product selection

Product model	Product specifications
BY-Q10	Suitable for 6-125A industrial waterproof plug

BY-Q11 Emergency Stop Button Guard

Unit: mm

BY-Q11

BY-Q11-1

Product Features

- Made of high-strength glass resin PC ;
- Visual management, protective buttons, preventing accidental touches during work production ;
- The bottom can be fixed with 3M adhesive.

BY-Q12/13 Industrial air defense plug lockout

Unit: mm

LQ12

LQ13

Product Features

- Made of polypropylene (PP) material;
- Used to lock industrial plugs to prevent misuse and accidental contact;
- Four safety padlocks can be used to lock simultaneously.

Product selection

Product model	Product specifications
BY-Q12	Applicable plug range: Length 120mm, diameter 69mm
BY-Q13	Applicable plug range: Length 261mm, Diameter 114mm

BY-Q14 Industrial waterproof plug lockout

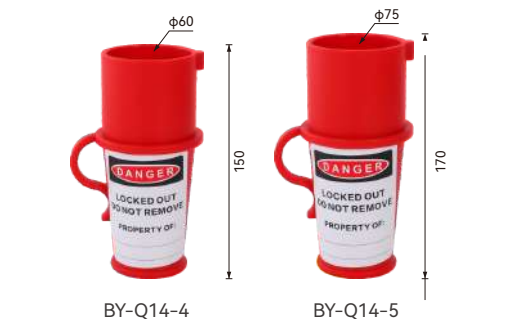

Unit: mm

BY-Q14-1

BY-Q14-2

BY-Q14-3

BY-Q14-4

BY-Q14-5

Product Features

- Made of engineering plastic PP;
- Cooperate with the hasp to lock the industrial waterproof plug;
- multiple padlocks can be locked at the same time;

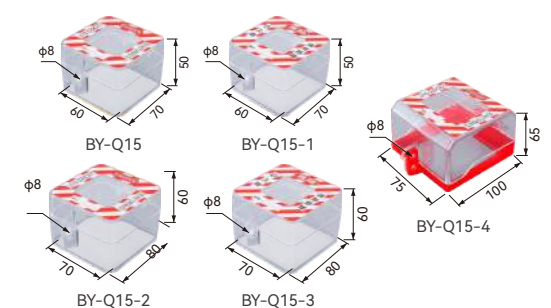

Product selection

Product model	Product specifications
BY-Q14-1	Lock body diameter 40mm, suitable for small industrial plug
BY-Q14-2	Lock body diameter 52mm, suitable for small industrial plug
BY-Q14-3	Lock body diameter 55mm, suitable for small industrial plug
BY-Q14-4	Lock body diameter 62mm, suitable for small industrial plug
BY-Q14-5	Lock body diameter 72mm, suitable for small industrial plug

BY-Q15 Rotary switch guard

Unit: mm

BY-Q15

BY-Q15-1

BY-Q15-2

BY-Q15-3

BY-Q15-4

Product Features

- The panel is made of glass fiber reinforced polycarbonate, and the base is made of nylon PA ;
- Visual management, can be fixed with 3M adhesive or screws;
- Suitable for rotary switches with a length and width of 50-75mm, and a height of 50-65mm.

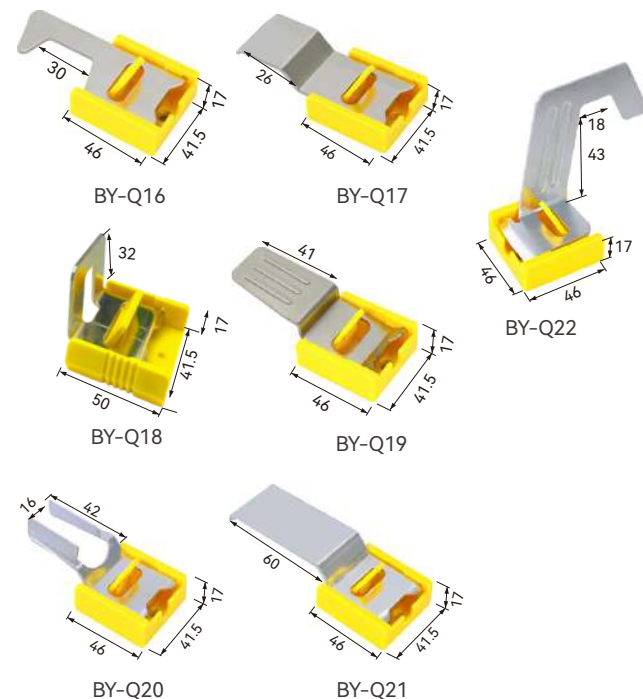

Product selection

Product model	Product specifications
BY-Q15	Suitable for rotary switches with length and width 50mm, height 50mm.
BY-Q15-1	Suitable for rotary switches with length and width 60mm, height 50mm.
BY-Q15-2	Suitable for rotary switches with length and width 60mm, height 60mm.
BY-Q15-3	Suitable for rotary switches with length and width 70mm, height 60mm.
BY-Q15-4	Suitable for rotary switches with length and width 70mm, height 65mm.

BY-Q Series Electrical Lockout

BY-Q16~22 Multi-functional industrial electric lockout

Unit: mm

Product Features

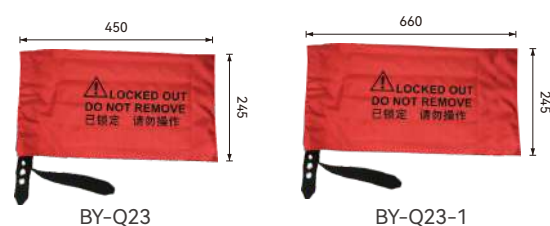

- The lock body is made of alloy engineering plastic and A3 steel plate (painted) ;
- Can locking for various non-standard electrical appliances or distribution cabinets;
- Fixed by double-sided 3M adhesive or screws;
- Locks can be designed in various shapes as per customer requirements;
- Base size: width 54mm × length 52mm, metal steel plate thickness 2mm.

Product selection

Product model	Product specifications
BY-Q16	Suitable for knob switches or toggle switches with a length 30mm.
BY-Q17	Suitable for button switches with a diameter of 26mm locking.
BY-Q18	Suitable for knife switch, handle switch locking
BY-Q22	Suitable for cabinet doors, drawer cabinets, electrical handle locking.
BY-Q19	Suitable for cabinet doors, drawer cabinets, electrical handle locking.
BY-Q20	Suitable for knob switches, toggle switches locking
BY-Q21	Suitable for button switches, distribution cabinet lock holes, cabinet doors, etc. with a length 60mm.

BY-Q23 Elevator control lock bag

Unit: mm

Product Features

- Made of soft and durable fabric;
- There is enough space to implement locking for various driving control buttons, as well as various oversized plugs or components;
- Insert the PVC liner to prevent others from accessing the buttons on the lift controller ;
- Surface printed warning signs;

Product selection

Product model	Product specifications
BY-Q23	Size : 450mm(W)x245mm(H)
BY-Q23-1	Size : 660mm(W)x245mm(H)

BY-Q24 ENTRY STOPPAGE BAG

Unit: mm

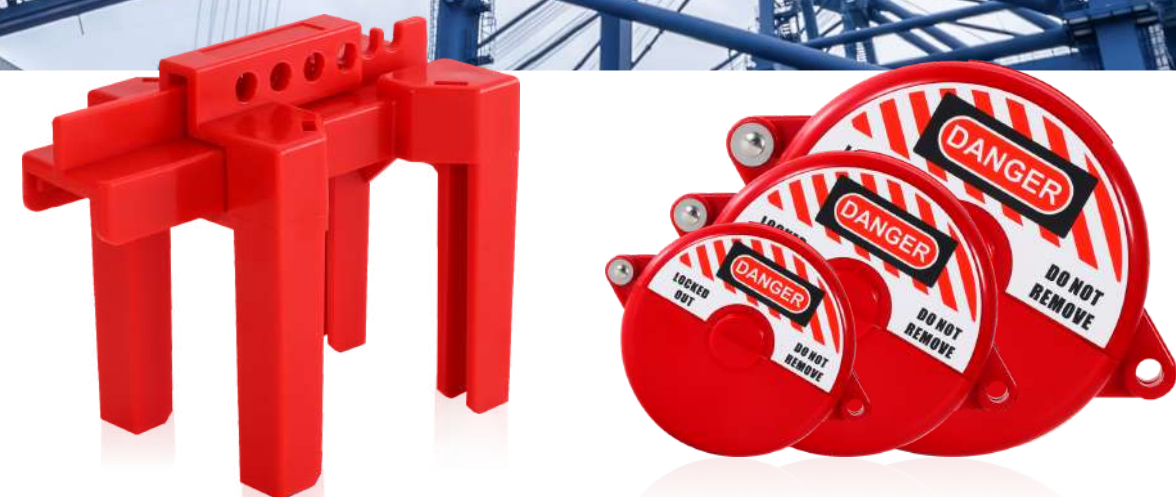

Product Features

- Made of wear-resistant polyester fabric;
- With a 5-meter cable lock, it can lock various entry holes;
- Surface printed warning signs;
- Customizable warning signs.

Product selection

Product model	Product specifications
BY-Q24	Size : 485mm(W)x420mm(H) Cables need to be purchased separately

04 Safety valve lock series

BY-F01~05 Standard gate valve lockout

Unit: mm

BY-F01~05

BY-F01T~05T

Product Features

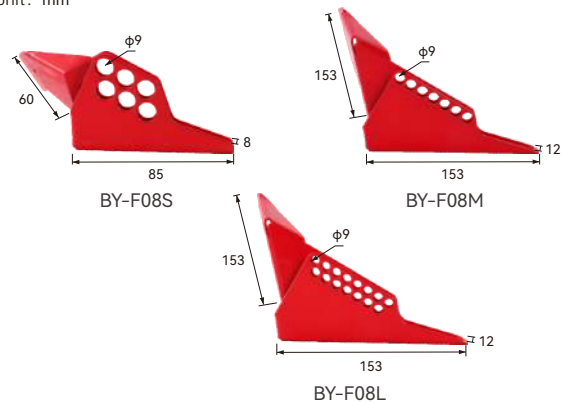

- Made of engineering plastic ABS;
- Dedicated to lock gate valves with handwheel diameters ranging from 25mm to 330mm;
- Capable locking a safety padlock with a shackle diameter of 9.8mm;
- Appearance: Red, other colors require customization
- ; provides English warning labels;

Product selection

Product model	Product specifications	A	B	C
BY-F01/01T	Suitable for 25-64 handwheels	80	30	20
BY-F02/02T	Suitable for 64-127 handwheels	140	39	45
BY-F03/03T	Suitable for 127-165 handwheels	184	44	63
BY-F04/04T	Suitable for 165-254 handwheels	280	67	90
BY-F05/05T	Suitable for 254-330 handwheels	364	66	105

BY-F08 Adjustable ball valve lockout

Unit: mm

Product Features

- Made of hardened steel, with a surface treated by high-temperature plastic spraying, it is not prone to rust ;
- Dedicated to locking the ball valve in the closed position during right-angle turns;
- Suitable for DN8-DN200 ball valve lock;

Product selection

Product model	Product specifications
BY-F08S	Suitable for DN8-DN50 ball valve lock
BY-F08M	Suitable for DN50-DN200 ball valve lock
BY-F08L	Suitable for DN50-DN200 ball valve lock

BY-F09 Adjustable flange ball valve lockout

Unit: mm

Product Features

- Made of engineering plastic ABS, temperature resistant from -20°C to +90°C;
- Can accommodate 1 padlock to lock, with a maximum shackle diameter of 8mm;
- Default is red, other colors can be customized.

Product selection

Product model	Product specifications
BY-F09	Suitable for 6.35mm (1/4") - 140mm (5") flange ball valve

BY-F10~14S/M/L Universal Valve Lock

Unit: mm

BY-F10S/10M/10L

BY-F11S/11M/11L

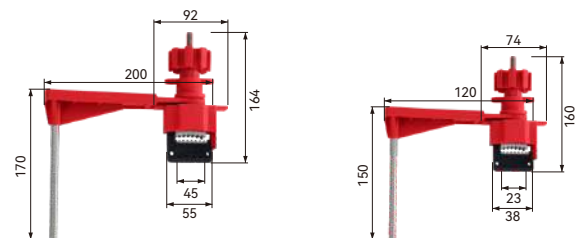

BY-F12S/12M/12L

BY-F13S/13M/13L

BY-F14S/14M/14L

Product dimensions

Product Features

- The lock body is made of engineering plastic reinforced nylon PA, stainless steel strips with teeth, stainless steel round bar ;
- The new type of open jaw clamp can be mounted on a closed loop, used on wide handles;
- Also applicable for locking large levers, T-shaped handles, and other difficult-to-fasten mechanical equipment;
- Cable accessories can be equipped with 1/8" (3.2mm) PVC stainless steel metal cable;
- Suitable for gate valves, ball valves, butterfly valves, and other types of valves.

Product selection

Product model	Product specifications
BY-F10S	Small valve lock, with a maximum opening size of 15mm, used in conjunction with a small retaining arm.
BY-F10M	Standard valve lock, jaw maximum height 28mm, suitable for use with a large arm for right-angle turns.
BY-F10L	Wide-type valve lock, maximum jaw height 45mm, used with a large arm.
BY-F11S	Small valve lock, silver mouth with a large diameter of 15mm, used in conjunction with two small retaining arms.
BY-F11M	Standard valve lock with a maximum jaw height of 28mm, designed to be used with two large retaining arms — suitable for use on three-way, four-way, five-way valves or valves in the "open", "closed" or "throttled" positions.
BY-F11L	Wide-type valve lock, maximum jaw height 45mm, compatible with two large retaining arms.
BY-F12S	Small valve lock, maximum jaw height 15mm, suitable for use with ropes.
BY-F12M	Standard valve lock, maximum jaw height 28mm, compatible with ropes — suitable for gate valves.
BY-F12L	Wide-type valve lock, maximum jaw height 45mm, compatible with ropes.
BY-F13S	The jaw can lock at a maximum height of 15mm.
BY-F13M	The jaw can lock at a maximum height of 28mm.
BY-F13L	The jaw can lock at a maximum height of 45mm.
BY-F14S	Small valve lock, maximum jaw height 15mm, used with a small arm and cable.
BY-F14M	Standard valve lock, maximum jaw height 28mm, compatible with a large arm and cable.
BY-F14L	Wide-type valve lock, maximum jaw height 45mm, compatible with a large arm and cable usage.

BY-F16 Adjustable flange ball valve lockout

Unit: mm

Product Features

- Made of engineering plastic ABS;
- Can be used with padlocks, maximum shackle diameter 9.8mm;
- Universal gate valve lock, adjustable locking range, suitable for valve handles from 25-165mm;
- Customizable in other colors.

Product selection

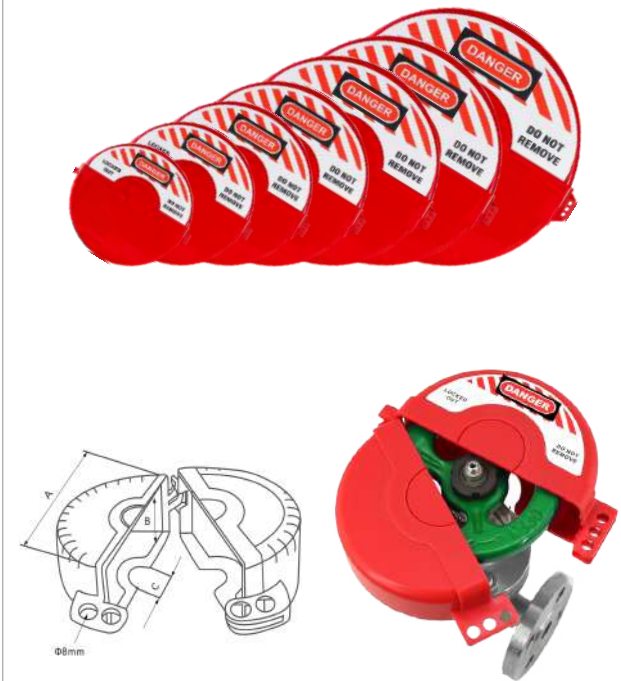

Product model	Product specifications
BY-F16	Suitable for 25-165mm handwheels

BY-F Series Valve Lockout

Your Well-being in Our Care

BY-F01~07Z Standard Gate Valve Lockout

Unit: mm

Product Features

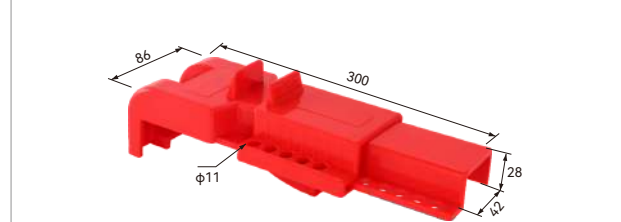

- Made of engineering plastic ABS, Without any metal components;
- Adopting a design with differently sized semicircles, it can be integrated into one when storing or carrying, reducing its volume by half, making it easier to store and manage ;
- Dedicated to lock gate valves with handwheel diameters ranging from 25mm to 330mm;
- Can be used with two padlocks with beams diameter 8mm;
- Appearance: Red, other colors are customizable, English labels are provided.

Product selection

Product model	Product specifications	A	B	C
BY-F01Z	Suitable for 25-64 handwheels	83	28	19
BY-F02Z	Suitable for 64-127 handwheels	136	38	39
BY-F03Z	Suitable for 127-165 handwheels	170	50	64
BY-F04Z	Suitable for 165-254 handwheels	260	59	85
BY-F05Z	Suitable for 254-330 handwheels	360	76	99

BY-F07Z	Suitable for 457-600 handwheel	655	63	135

BY-F17 Adjustable butterfly valve lockout

Unit: mm

Product Features

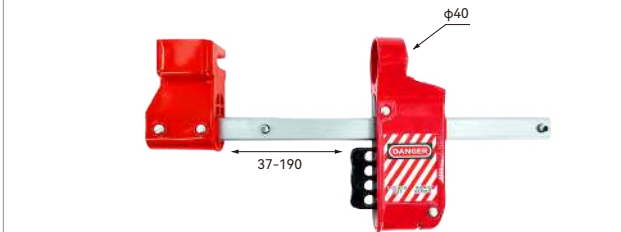

- Made of engineering plastic ABS;
- Locking with a safety padlock with a shackle diameter 7mm ;
- Color: Red, other colors need to be ordered.

Product selection

Product model	Product specifications
BY-F17	Suitable for disc valves with handle width of 8mm-45mm

BY-F23 Sanitary butterfly valve lockout

Unit: mm

Product Features

- Made of aluminum alloy & engineering plastic;
- Capable of locking with 4 safety padlocks simultaneously;

Product selection

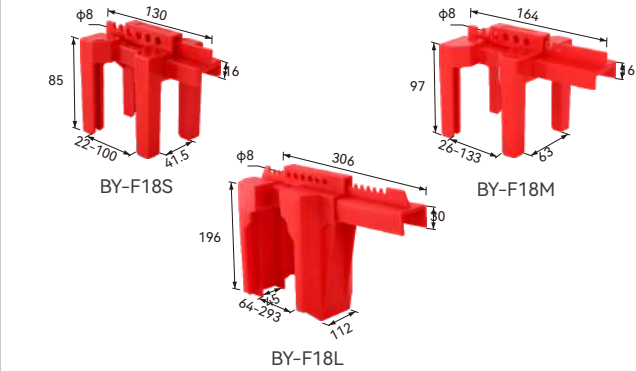

Product model	Product specifications
BY-F23	Adjustable range between 37mm to 190mm

BY-F Series Valve Lockout

Your Well-being in Our Care

BY-F18 Adjustable ball valve lockout

Unit: mm

Product Features

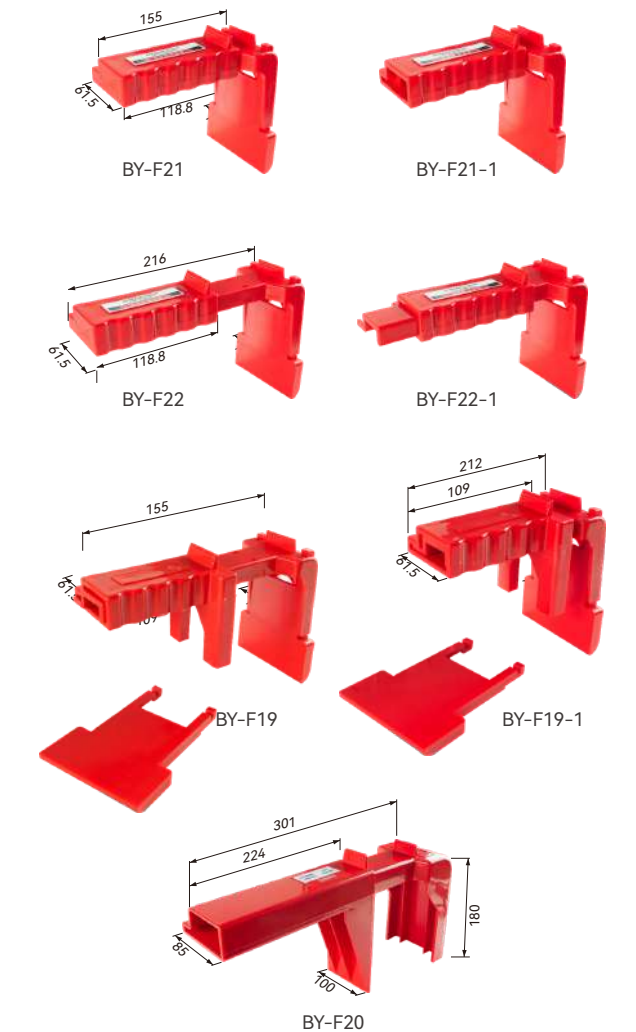

- Made of engineering plastic ABS;
- The ball valve handle can be fixed in the open or closed position to prevent rotation, with a temperature resistance of -30°C to 120°C, and is sturdy and durable;
- Supports multi-user locking management;
- Customizable lock body color, laser engraving.

Product selection

Product model	Product specifications
BY-F18S	Suitable for DN8-DN50 ball valve lock
BY-F18M	Suitable for DN50-DN100 ball valve lock
BY-F18L	Suitable for DN50-DN200 ball valve lock

BY-F19~22 Adjustable ball valve lockout

Unit: mm

Product Features

- Made of engineering plastic ABS;
- The ball valve handle can be fixed in the open or closed position to prevent rotation; temperature resistant from -20°C to 90°C, sturdy and durable.
- Suitable for DN8-DN200: pipe diameter 9.5cm-70cm;
- Supports multi-user locking management;
- Customizable labels, lock body color, laser engraving.

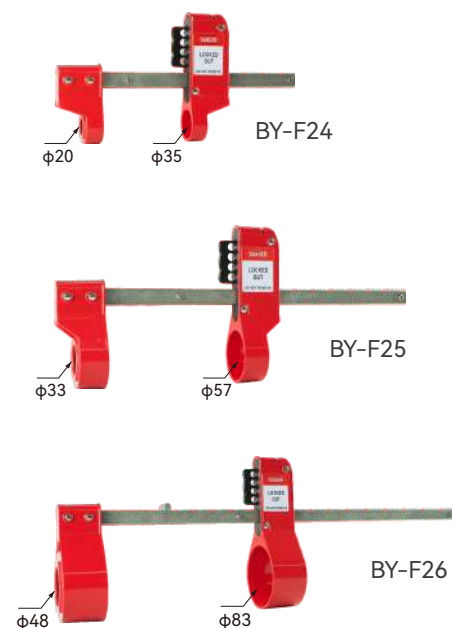

Product selection

Product model	Product specifications
BY-F21	Suitable for DN8-DN50 ball valves
BY-F21-1	Suitable for DN8-DN50 ball valves
BY-F22	Suitable for pipes with diameters ranging from 9.5mm (3/8 inch) to 31mm (1 1/5 inch), with front and back footplates.
BY-F22-1	Suitable for DN50-DN70 ball valves
BY-F19	Suitable for DN8-DN50, DN50-DN70 ball valves
BY-F19-1	Suitable for pipes with diameters ranging from 13mm (1/2 inch) to 70mm (2 3/4 inch), featuring front and back footplates.
BY-F20	Suitable for DN50-DN200 ball valves

BY-F24~26 Blind flange lockout

Unit: mm

Product Features

- Made of aluminum alloy & engineering plastic;
- Four safety padlocks can be locked at the same time , Supports multi-user locking management ; Durable
- powder-coated aluminum fixtures + hardened steelsliding bars ensure ensure indoors and outdoors us use indoors and outdoors.

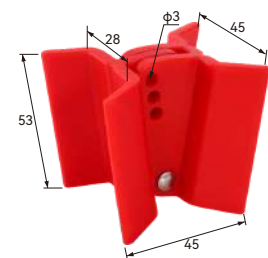

Product selection

Product model	Product specifications
BY-F24	Suitable for blind flange width between 30mm-240mm
BY-F25	Suitable for blind flange width between 95mm-370mm.
BY-F26	Suitable for blind flange width between 190mm-530mm.

BY-F27 Standard Butterfly Valve Lockout

Unit: mm

Product Features

- Made of PA modified enhanced nylon, durable, lightweight, resistant to chemical corrosion, and can effectively lock in extreme environments;
- Use in conjunction with the cable lock, thread the cable through the lock hole and secure it around the neck of the valve, then lock it with a safety padlock.

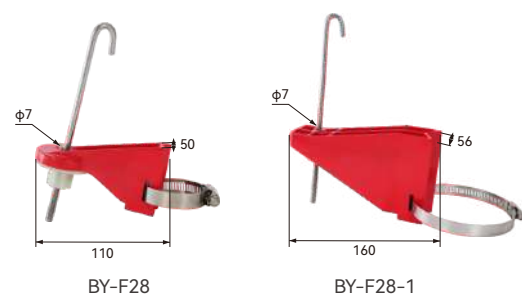

Product selection

Product mode	Product specifications
BY-F27	The adjustable angle is from 15° to 36°.

BY-F28 Standard ball valve lockout

Unit: mm

Product Features

- The lock body is made of stable and wear-resistant zinc alloy materialand the surface is treated by high temperature plastic spraying;
- It is used to lock the industrial ball valve in the closed state to preventmisuse and touch by mistake;
- Maximum diameter of locking beam: 7mm;
- Applicable to all ball valves with handle thickness≤10mm.

Product selection

Product mode	Product specifications
BY-F28	Dimensions: 163×56×92 Applicable handle length 150
BY-F28-1	Dimensions: 108×39×52 Applicable handle length 150

BY-F29~32 Screw plug valve lockout

Unit: mm

Product Features

- Composed of engineering plastic ABS and stainless steel locking straps;
- Suitable for manual plug valves with a diameter of 1" to 8";
- applicable to this kind of valves that difficult to lock;
- Durable, anti-tamper, compact size, easy to use.

Points for attention

Select a valve lock of appropriate size

Measure the size from A to B, that is, the diameter of the valve stem, and then select the appropriate plug valve lock according to the diameter of the valve stem.

The re-opening of the valve is extremely simple

If the valve stem plane above the wrench and clamp can still fully engage, the plug valve lock base and fixture can remain on the valve for future use; at this point, simply remove the lock box plug valve cap to open the valve.

BY-F31	Handwheel diameter44~52mm
BY-F32	Handwheel diameter55~62mm

BY-F33/34 Multi-purpose valve lockout

Unit: mm

Product Features

- Composed of PA modified reinforced nylon, toothed carbon steel sheets, and stainless steel screws;
- Equipped with locking screws, It can be locked easily without tools;
- Maximum diameter of the lock bar: 7mm;
- Height 192mm × Width 94mm × Depth 32mm (excluding the length of the screw rod);
- Applicable the range of valve height : 31mm-100mm ;

Product selection

Product model	Product specifications
BY-F33/F33-1	Applicable for locking disc valves
BY-F34/F34-1	Applicable for locking T-type valves

05 Pneumatic/bottle lock series

BY-QD Series Pneumatic Lockout

Your Well-being in Our Care

BY-QD01 Cylinder lockout

Unit: mm

Product Features

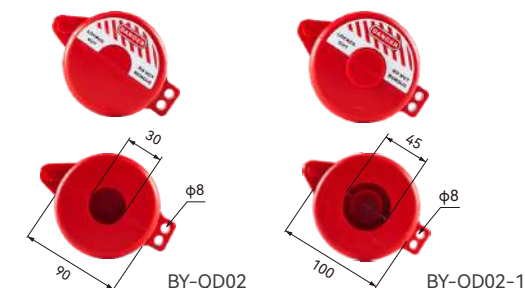

- The lock body is made of engineering plastic ABS;
- Prevent unauthorized operation of the cylinder valve, which must match the cylinder cap diameter and thread perfectly.

Product selection

Product model	Product specifications
BY-QD01	Suitable for cylinder caps with a neck diameter 35mm, inner diameter 89mm.

BY-QD02 Tank lockout

Unit: mm

Product Features

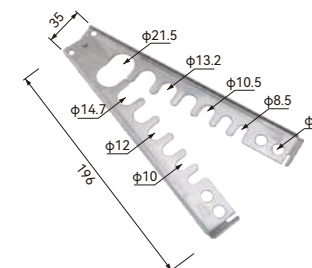

- Made of engineering plastic ABS, temperature resistant from -20°C to 120°C;
- Equipped with English warning labels, easy to install;

Product selection

Product model	Product specifications
BY-QD02/02-1	Suitable for tanks, propane tanks, etc. locking

BY-QD03 Pneumatic lockout

Unit: mm

Product Features

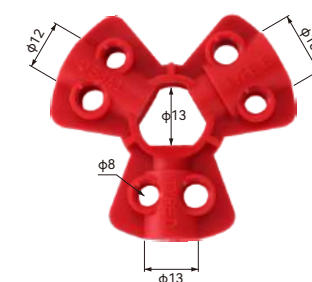

- The lock body is made of 304 stainless steel;
- It prevents the air source connector from being reconnected to the high-pressure source, allowing two people to lock it together.

Product selection

Product model	Product specifications
BY-QD03	Suitable for air source connectors with a diameter of 7mm-20mm.

BY-QD04 Pneumatic Quick-Circuit Lockout

Unit: mm

Product Features

- The lock body is made of engineering plastic nylon PA.
- 3 locked dimensions, The center hole can be used to store air hoses.

Product selection

Product model	Product specifications
BY-QD04	Suitable for thread joints with diameters of 12mm/13mm/16mm

06 Safety cable Lock Series

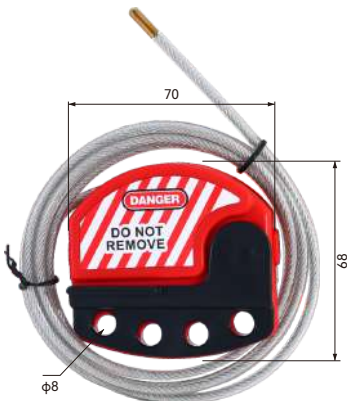

BY-L Series Cable lockout

Your Well-being in Our Care

BY-L01/02 Adjustable cable lockout

Unit: mm

Product features

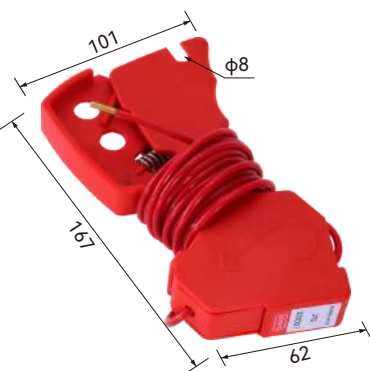

- The lock body is made of engineering plastic ABS and has strong corrosion resistance, other colors can be customized ;
- The cable is made of multi-strand steel wire, and the outer layer of the cable is made of transparent PVC.
- Cable length can be customized.
- 4 padlocks can be locked at the same time.
- It has high visibility. The surface of the lock body has an erasable tag, which can be rewritten repeatedly, and the length can be customized.

Product selection

Product model	Product specifications
BY-L01	Cable diameter: 4mm, length: 2m
BY-L02	Cable diameter: 6mm, length: 2m

BY-L03 Handheld cable lockout

Unit: mm

Product features

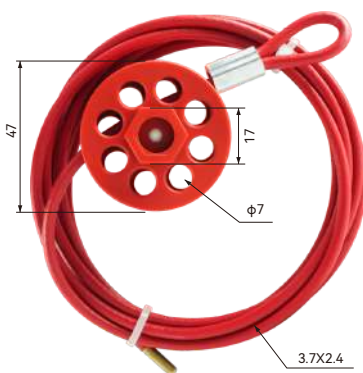

- The lock body is made of engineering nylon PA with high corrosion resistance.
- The cable is made of multi-strand steel wire, and the outer layer of the cable is made of red PVC.
- Cable length can be customized.
- It supports a padlock for locking.
- It can be used with Buckle extension lock to achieve the purpose of multi-user locking management.

Product selection

Product model	Product specifications
BY-L03	Cable diameter: 4mm, length: 2m

BY-L04 Wheel-type cable lockout

Unit: mm

Product Features

- The lock body is made of engineering plastic PA;
- Using stainless steel cables, the outer layer of the cables is made of UV-resistant PVC;
- Customizable in both color and length;
- Multiple padlocks with a shackle diameter of 7mm can be used to secure locking;
- It can lock various isolation points effectively, including gate valves, T-handle valves, and other mechanical equipment that are difficult to secure, etc.

Product selection

Product model	Product specifications
BY-L04	Cable diameter: 4mm, length: 2m

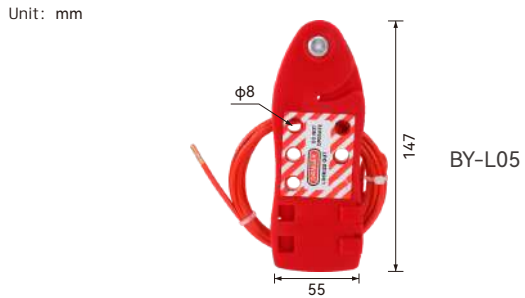

BY-L Series Cable lockout

Your Well-being in Our Care

BY-L Series Cable lockout

Your Well-being in Our Care

BY-L05 Economic fish-shaped cable lockout

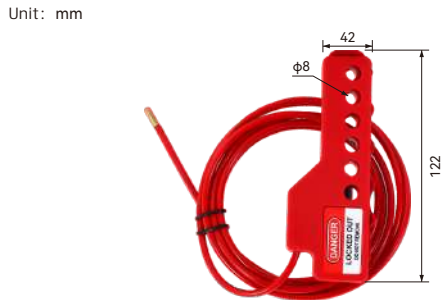

Product features

- The lock body is made of engineering plastic ABS, and the outer layer of the cable is made of red PVC;
- Six safety padlocks can be locked at the same time;
- The color and length can be customized;
- It has high visibility, the surface of the lock body has a writable label, which can be erased repeatedly, and the length can be customized.

Product selection

Product model	Product specifications
BY-L05	Cable diameter: 3.8mm,length: 2m

BY-L06 Simple cable lockout

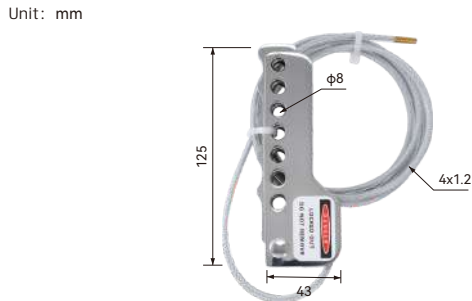

Product features

- The lock body is made of nylon PA; the cable is made of stainless steel, and the outer layer of the cable is made of PVC;
- It is compact and easy to install, with built-in labels;
- Supports locking for 5 people together;
- Customizable cable length, color, and label.

Product selection

Product model	Product specifications
BY-L06	Cable diameter: 3.3mm,length: 2m

BY-L06B Stainless Steel Handheld Cable Lockout

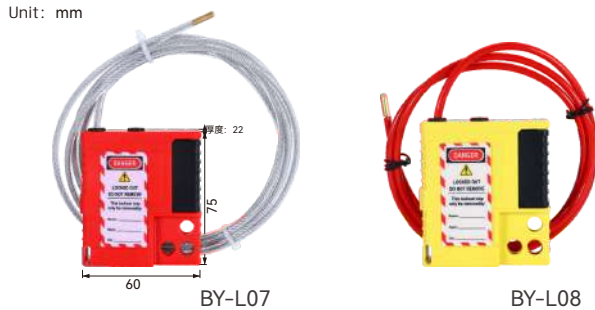

Product features

- The lock body is made of stainless steel; the cable is made of stainless steel, and the outer layer of the cable is made of PVC;
- Adjustable cable, anti-rust and anti-spark, comes with a label;
- Supports locking for 7 people;
- Customizable cable length, color, and label.

Product selection

Product model	Product specifications
BY-L06B	Cable diameter: 3.3mm,length: 2m

BY-L07/08 Self-locking cable lockout

Product features

- The lock body is made of engineering plastic ABS;
- It uses stainless steel cables, with the outer layer of the cables made of UV-resistant PVC;
- Innovative self-locking function, the cable is in a self-locking state when not operated, ensuring the cable is not stretched at will;
- Can be permanently labeled (in English or other languages) to identify the operator;
- Can be locked with 5 safety padlocks with a shackle diameter less than 7mm.

Product selection

Product model	Product specifications
BY-L07/08	Cable diameter: 3.8mm,length: 2m

BY-L09/10 Handheld cable lockout

BY-L12 Adjustable cable lockout

Product features

- The lock body is made of ABS;
- The outer layer of the cable is made of red PVC;
- Five safety padlocks can be locked at the same time;

Product selection

Product model	Product specifications
BY-L09	Cable diameter: 3mm,length: 2m
BY-L10	Cable diameter: 3mm,length: 2m

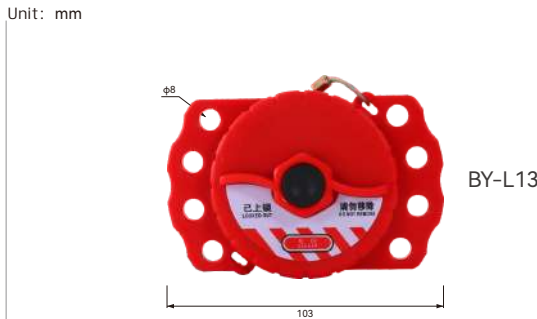

Product features

- The lock body is made of engineering plastic ABS;
- It uses stainless steel cables, with the outer layer of the cables made of UV-resistant PVC;
- Innovative self-locking function, the cable is in a self-locking state when not operated, ensuring the cable is not stretched at will;
- Can be permanently written with labels (in English or other languages) to identify the operator;
- Can be locked with 5 safety padlocks with a shackle diameter 7mm.

Product selection

Product model	Product specifications
BY-L12	Cable diameter: 1.5mm,length: 0.3m

BY-L13 New adjustable cable lockout

Product features

- The lock body is made of ABS, with a stainless steel cable inside a PVC sheath, resistant to corrosion and high temperatures;
- After pressing the button, the excess cable automatically retracts and coils, tightening the cable to complete the effective locking;
- It can lock various circuit breakers and small gate valves effectively;
- It features an automatic cable retraction function, easy to operate, compact and portable;
- Eight safety padlocks can be locked at the same time, the maximum diameter of the lock beam is 8mm;
- The product color and cable length can be customized.

Product selection

Product model	Product specifications
BY-L13	Rope diameter: 1.5mm Length: 2m

BY-L14 Adjustable cable lockout

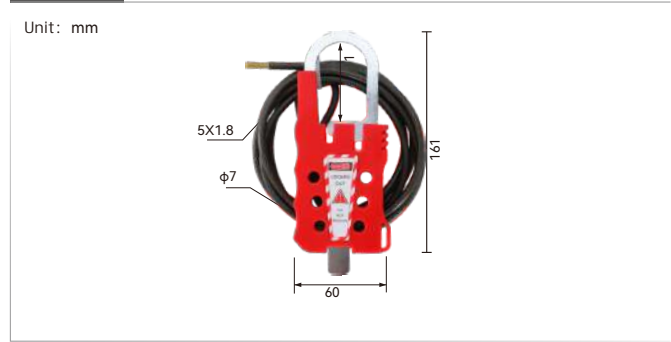

Product features

- The lock body is made of ABS engineering plastic, which is corrosion-resistant;
- The cable is made by twisting multiple strands of steel wire, with the outer layer made of red PVC;
- The cable diameter is 4.3mm, and the length is 2m;
- The length of the cable can be customized;
- Supports locking with 6 padlocks, with a lock shackle diameter less than 11mm.

Product selection

Product model	Product specifications
BY-L14	Cable diameter: 4.2mm,length: 2m

BY-L15 Adjustable cable lockout

Product features

- The lock body is made of ABS+PC alloy;
- It uses stainless steel cables, with the outer layer of the cable s made of UV-resistant PVC;
- It can be locked with 6 safety padlocks with a shackle diamet er 7mm;
- The color is red.

Product selection

Product model	Product specifications
BY-L15	Cable diameter:5mm,length:1.8m

BY-L16 Micro cable lockout

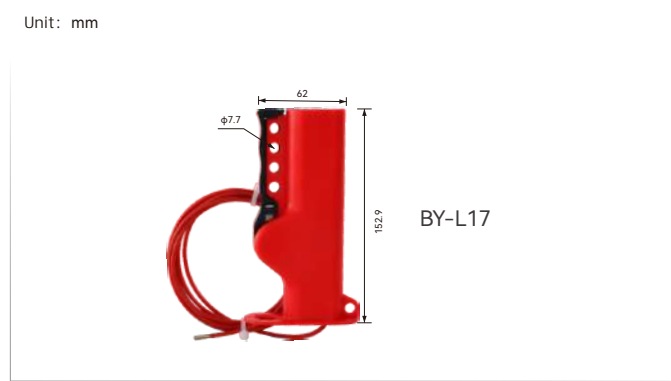

Product features

- The lock body is made of engineering plastic nylon PA;
- The stainless steel cable is used, with the outer layer made of UV -resistant PVC;
- The black part is pushed up to open the cable, pushed down to l ock the cable, and there is a LOCKOUT reminder function on the r ed part;
- After locking, the cable can only be tightened, which makes oper ation more convenient;
- Customizable labels (customizable in multiple languages);
- Equipped with 6mm and 8mm locking apertures, suitable fo r lock beams of different specifications.

Product selection

Product model	Product specifications
BY-L16	Cable diameter:1.5mm,length:0.5m

BY-L17 Handheld cable lockout

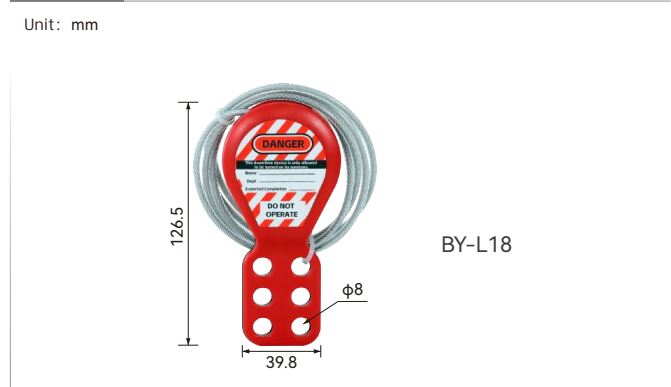

Product features

- The lock body is made of ABS, with steel cables, and the out er layer of the cables is made of red PVC;
- it can accommodate the management of 4 people at the sa me time;
- The color of the lock body and the size and length of the cab le can be customized.

Product selection

Product model	Product specifications
BY-L17	Cable diameter:3.2mm,length:2.4m
BY-L17-1	Cable diameter:5mm,length:2.4m

BY-L18 Adjustable cable lockout

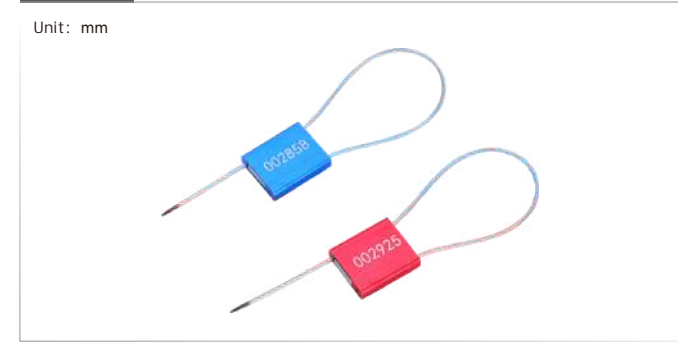

Product features

- The lock body is made of ABS engineering plastic, which is c orrosion-resistant;
- The cable is made of twisted multi-strand steel wires, with t he outer layer made of red PVC;
- The cable diameter is 4.3mm, and the length is 2 meters. Th e cable length can be customized;
- Supports locking with 6 padlocks, with lock shackle diamete r less than 11mm.

Product selection

Product model	Product specifications
BY-L18	Cable diameter:4.2mm,length:2m

BY-L19 Lead blockade

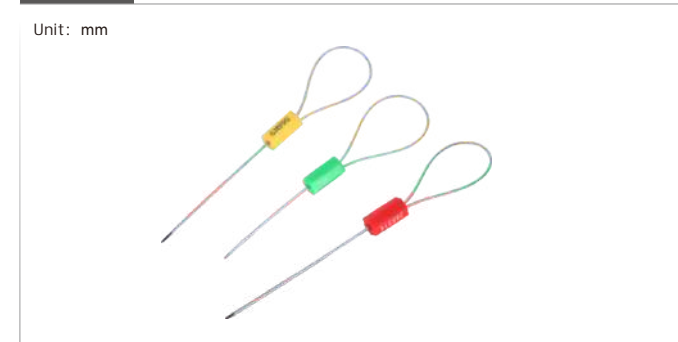

Product features

- Suitable for long-term locking situations, after locking, the l ock can only be opened by cutting the cable;
- All aluminum seals have individual laser-printed numbers;
- The length of the cable can be customized;
- The color can be customized, with standard colors being re d, yellow, green, and blue.

Product selection

Product model	Product specifications
BY-L18	Aluminum alloy lock body, galvanized cable rope. Cable diameter: 2.5mm Width: 256mm

BY-L20 Lead blockade

Product features

- Suitable for the places that need to be locked for a long time , after locking, the lock can only be opened by cutting the cable;
- All aluminum seals have individual laser-printed numbers;
- The length of the cable can be customized;
- The color can be customized, with standard colors being red , yellow, green, and blue.

07 Safety Warning Tag Series

Safety Warning Tag

Product Introduction

- It can be used to control equipment comprehensively to protect personnel from injury and prevent damage to the equipment.
- Used with safety padlocks in conjunction, it serves as a reminder that the equipment has been locked and cannot be operated. It also indicates that the locking procedure can only be undone by the person who applied the lock, ensuring that the user can be identified immediately in a factory setting to protect the safety of workers;
- The safety tag has safety warning slogans such as "Danger/Do Not Operate/Warning" and blank spaces for users to fill in items like "Name/Department/Estimated Completion Time".

Label customization service

- Labels can provide customization services in English or other multiple languages on both sides

- Customizable color for label text content

Scaffolding Tags

Product Introduction

- Used to indicate the status and availability of scaffolding, available to be tied onto cables, suitable for all legal hanging points.
- The card with sign is embedded in slot, different colors indicating various warning effects:
Green card: The cardstock is embedded with the green side facing out, indicating that the scaffolding is safe and can be used normally;
Yellow card: The cardstock is embedded with the yellow side facing out, indicating that the scaffolding is faulty and under maintenance;
Red card: The cardstock is not embedded in the sign, and the warning text and patterns on the sign itself are displayed in red, indicating that the scaffolding is prohibited from use.

Label customization service

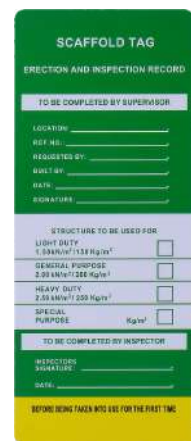

The labels can provide customization services in English or other multiple languages for both sides.

Integrated label slot

Made of high-strength ABS engineering plastic, resistant to heat, cold, and corrosion;
Available in multiple colors for use by different departments.

The label reads "Do not use this device";
Customized services are available, printing specific content such as customer information, company logo, contact number, etc.;
Languages: Chinese, English, multilingual including Chinese and English, etc.

Normal use
(Green card)

Under maintenance
(Yellow card)

Labels (made of PVC material)

08 LOCKOUT STATION

LOCKOUT STATION SERIES

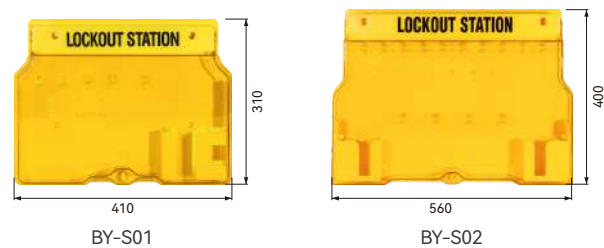

BY-S Series Lockout station

Your Well-being in Our Care

BY-S01/02 Integrated Lockout station

Unit: mm

Product features

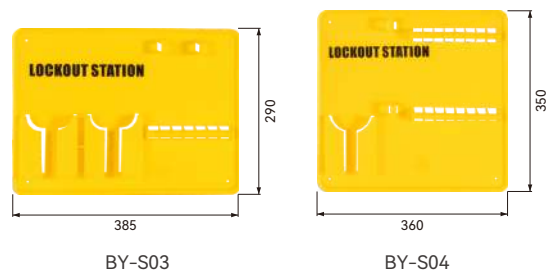

- The whole body is made of engineering plastic PC, with an integrated design, solid and durable;
- Integrated design, locking with cover.
- It can accommodate several padlocks, hasps, tags, etc.
- Locking with cover can effectively prevent irrelevant personnel from moving the locks and prevent lock loss .

Product selection

Product model	Product specifications
BY-S01	410mm(W)×310mm(H)×65mm(T)
BY-S02	560mm(W)×400mm(H)×65mm(T)

BY-S03/04 Open-ended Lockout station

Unit: mm

Product features

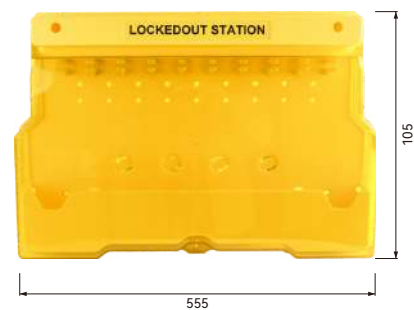

- Made of PP material, the product is wear-resistant, corrosion-resistant, and resistant to low temperatures;
- It can be equipped with various hasp, padlocks, and can hold tags, zip ties, etc.

Product selection

Product model	Product specifications
BY-S03	385mm(W)×290mm(H)×40mm(T)
BY-S04	360mm(W)×350mm(H)×40mm(T)

BY-S05 Integrated Lockout station

Unit: mm

Product features

- The outer cover is made of plastic PC, and the base plate is made of engineering plastic ABS;
- With a lockable lid to prevent accidental touching, it can accommodate 16 padlocks and other locking devices;
- Customizable base plate color, laser engraving.
